The road hazard protection will remain in effect until the tire is worn down to 3/32". You do not need to purchase new road hazard protection for a tire that has been repaired.

If a tire covered by this road hazard protection plan becomes unserviceable due to a road hazard during the useable tread life of the tire, it will be replaced with a comparable new tire. If available, an exact make/model replacement will be installed. If not available, a comparable quality tire will be installed. Under no circumstances will the coverage exceed the maximum value imprinted on the invoice. You are responsible for any additional charges including but not limited to mounting, balancing taxes and miscellaneous fees. When a tire failure occurs in the first 25% of useable tread wear, and in the opinion of the servicing dealer the tire cannot be safely repaired, the tire will be replaced with coverage up to the original purchase price of the tire(s) or the replacement tire cost, whichever is the lesser. After the first 25% of useable tread wear the covered amount is calculated based on the consumed useable tread wear and the original purchase price of the tire(s) or the replacement tire cost, whichever is the lesser. When a tire is worn down to 3/32" (tread wear indicators) the tire is considered worn out and is not eligible for any adjustment. IN ORDER TO MAINTAIN THE ROAD HAZARD PROTECTION ON THE REPLACEMENT TIRE, YOU MUST PURCHASE A NEW ROAD HAZARD PROTECTION PLAN FOR THE TIRED.
